### About This Game

From the scenario writer of "Folklore", the critically acclaimed RPG for Playstation 3. Follow Asumi as she travels to Tokyo alone to search for her only sister whom she has mysteriously not heard from for months. Highlighted by a genuinely intelligent and unpredictable story, uncover a frightening truth in this dramatic and thrilling suspense mystery.

*"We used to Fight As Children...  
We Fought Over the TV...  
I wanted to watch cartoons and you wanted to watch science programs...  
In the end I'd always burst into tears...  
And you'd always let me watch what I wanted...  
Father was always busy...  
It was always just the two of us...  
We used to go to the festival every summer...  
Always...together...  
You smiling beside me...wearing the same yukata...  
But one year we stopped going...a boy picked you up... I knew you liked that boy  
I used to stand by the door watching you...  
The teddy bear you gave me that one day... I still have it. I've been taking good care of it.  
The darkness of the night is scary...it makes me more aware of how lonely I am..."*

Into Blue Valley gives a nice and interesting concept with mystery and horror themes but it is really short and has a little bug like getting struck, game crash etc. Not recommend buying it on full prices. Wait for sale.

. Really wanted to like this. It felt extremely cool, subnautica in space I said to myself.

Then the doors said they were open when they were closed.

Then I died from lack of oxygen when I had plenty of oxygen.

Then it told me to make a plant and I did, at least a plant-pot, but that is all the direction I got.

So in short, this could be cool, but apparently it is "finished" and the developer is not fixing this stuff.

. monsters, dead dogs, elves. Very addictive, much old <3. this game cured my depression. WAIFUS EVERYWHERE 10/10. This is a pretty good Third Person Shooter with full story co-op and AI temates that are often more effective than human players.

It plays a lot like Gears of War crossed with Mass Effect Multiplayer and features a very good drop in drop out coop mode which has plenty of checkpoints to minimize frustration. A bit lacking in polish but very advanced and ambitious for an indie game. Feels like a steal considering the price.

A couple of weak points are the "magic" system which doesn't really seem to work though you can get through the game without using it and the fact that the ammo crates aren't universal so you will constantly find yourself dropping weapons so that you can pick up one which is compatible with the local ammunition boxes. This was probably added for realism but it is annoying and doesn't add anything good to the game.

Another weak point is the fact that the game directs you to use grenades on the first armored helicopter but later in the game, you face a second armored helicopter which has exactly the same design but is impervious to grenades (you can only kill this one by going upstairs and grabbing the special heavy weapon which will enable you to shoot it down though the game doesn't tell you this and even gives you a box of useless grenades as if trying to trick you into rage-quitting.)

Other than that though, it is mostly a good game. Be warned however, the ending is a cliffhanger. This game was obviously intended to have a sequel which was never made. I hope they make a sequel someday but I wouldn't bet money on it.. quote;VCB: Why City" Review

When I saw a title in the "New Releases" section that went by the name of "VCB: Why City" in the new releases section, I figured it was just another Grand Theft Auto knockoff (Lol, you know the kind, Mafia, Jumpix Jump, Watch Dogs, Witcher, Sleeping Dogs, Saints Row, Skyrim, Fallout, Elder Scrolls, Morrowind). But, I did a double take when I learned that this game was a parody of the open world genre! And a great parody it is! The biting satire and wit present in this game's story and dialogue would make Jon Swift himself salivate. If you're not into ironic humor, than go play one of those humourless (like Borderlands, for example!) Lol.

#### PROS:

- + The soundtrack, featuring rappers like MC Poh, provides a strong, steady beat, to match the chaotic rhythm of the epic gunfights and battle sequences.
- + Though the main protagonist is male, they sneak in a strong woman in Karina, who acts as a comic foil, yet is clearly independent and ambitious with her work as a streamer!
- + Some jokes push the envelope a little bit (Crude!) But they always do so with a purpose, and will leave even the marble man in "The Thinker" giggling.
- + Challenging driving and shooting mechanics. The weapon spread is calibrated fantastically!

#### CONS:

- Fat shaming. There's been too much fat shaming in games, and as a man who is a bit portly (but healthy), I do tend to take offence to these "jokes". Though our weight may be high, we make up for it in heart. Micro-aggressions and punching down.
- There are a few jokes about People of Size. PoS's like myself already take a beating in popular culture—why carry it on into the virtual world. "The Media" treats us bad enough.
- I wouldn't let my child play this game. I don't have one, but I'd start him off on an educational game first!

All in all, this game nails it. For the price, you can't beat it! Three dollars for a great work of satire. These Russians sure know how to make a game! Maybe I'll visit Moscow and ask them for some tips : - ) (I'm working on becoming a programmer!)

Anyways, Loveing This Game.

9.1/10

A Dave 2003 Review

. This was a really fun TPS with a lot of character to it, but sadly it was already dying back when Uber was releasing Super MNC. It's WAAAY dead now, and the only way you'll get a match is if you pre-schedule it with friends, or there's a super dedicated following that plays on select days/times of the week.. The last chapter from the previous 2 games, this is more disturbing and has more difficult puzzles than the previous 2 games. Involving jumpscars as well, but I noticed it also lack the same feeling from Underworld where you would feel at any moment you would get chased by a creature. But still, there are still some chase scenes and the disturbance throughout the game really makes it even more horrifying. It also really goes from what the title of this game is saying too.. This game is a no for me based on how the character controls - jumping and moving feel weightless. Enemy combat is also very simple as you run in, swing your sword, then run away -it feels tedious. Finally, although the game does a good job and mixing up what you have to do (shooting yourself out of cannons, dk carts, unique puzzles), I found a lot of the experiences to be poorly executed.

Play luckys tale instead!

For those of you who just want a reason to buy it, here are the pros.

Things the game does well:

- +strongly themed worlds
- +Long experience
- +hidden collectibles
- +Diversified gameplay (donkey Kong karts, blast your self out of a cannon, puzzling, platforming, combat)

I dont care about the negative reviews. I am enjoying it and i think its a decent game.

The only thing i want to mention that bothered me is the price, its a bit too high in my opinion.. **COULDNOT RUN IT AT ALL.WHY?(xp)**. This game is about the genetic engineering of animals. You play as an intelligent morey of the size you choose. Keep in mind the size of morey changes the way you play the game, to an extent. I recommend this game, because you get to feel the racial tensions between humans and moreys, and this is a pretty good mirror to today's world of racial tensions.. **WARNING: Avoid from using smooth rotation (the right trackpad) as this will cause nausea for almost everyone except those with strong "VR legs" - use snap rotation (L/R trigger) instead\*\***

Great demo consisting of explorable scenes from the game. If only there was an actual game in VR with this level of detail..  
-STEEL EMPIRE-

Its Gameplay and Controls feel great.

its Steampunky art style is superb and its Aged really well.

This Version ran absolutley fine and if ur looking to scratch that Shmup Itch then this will do it for you.

I wish alot more old retro style games were done as good as this.

Thanks guys for Bringing this to steam :D

Hey everyone, I wanted to send out an update so I could clear some confusion about what's happening with the game, and give some info on our next feature update!

We've all been reading the reviews, and I've seen quite a few negative ones. They mostly consist of:

- Unable to find other players.
- Sessions dying due to players quitting
- Minor (annoying), non gamebreaking bugs

So, here's what's happening on our side:
